

Sabre of Sultar walkthrough

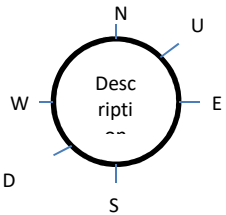

The opening instructions give good details of known commands.

Here's some tips if you are stuck in a particular spot and don't want a full walk through. It's also the rough order to complete the game. Map below and then complete step by step.

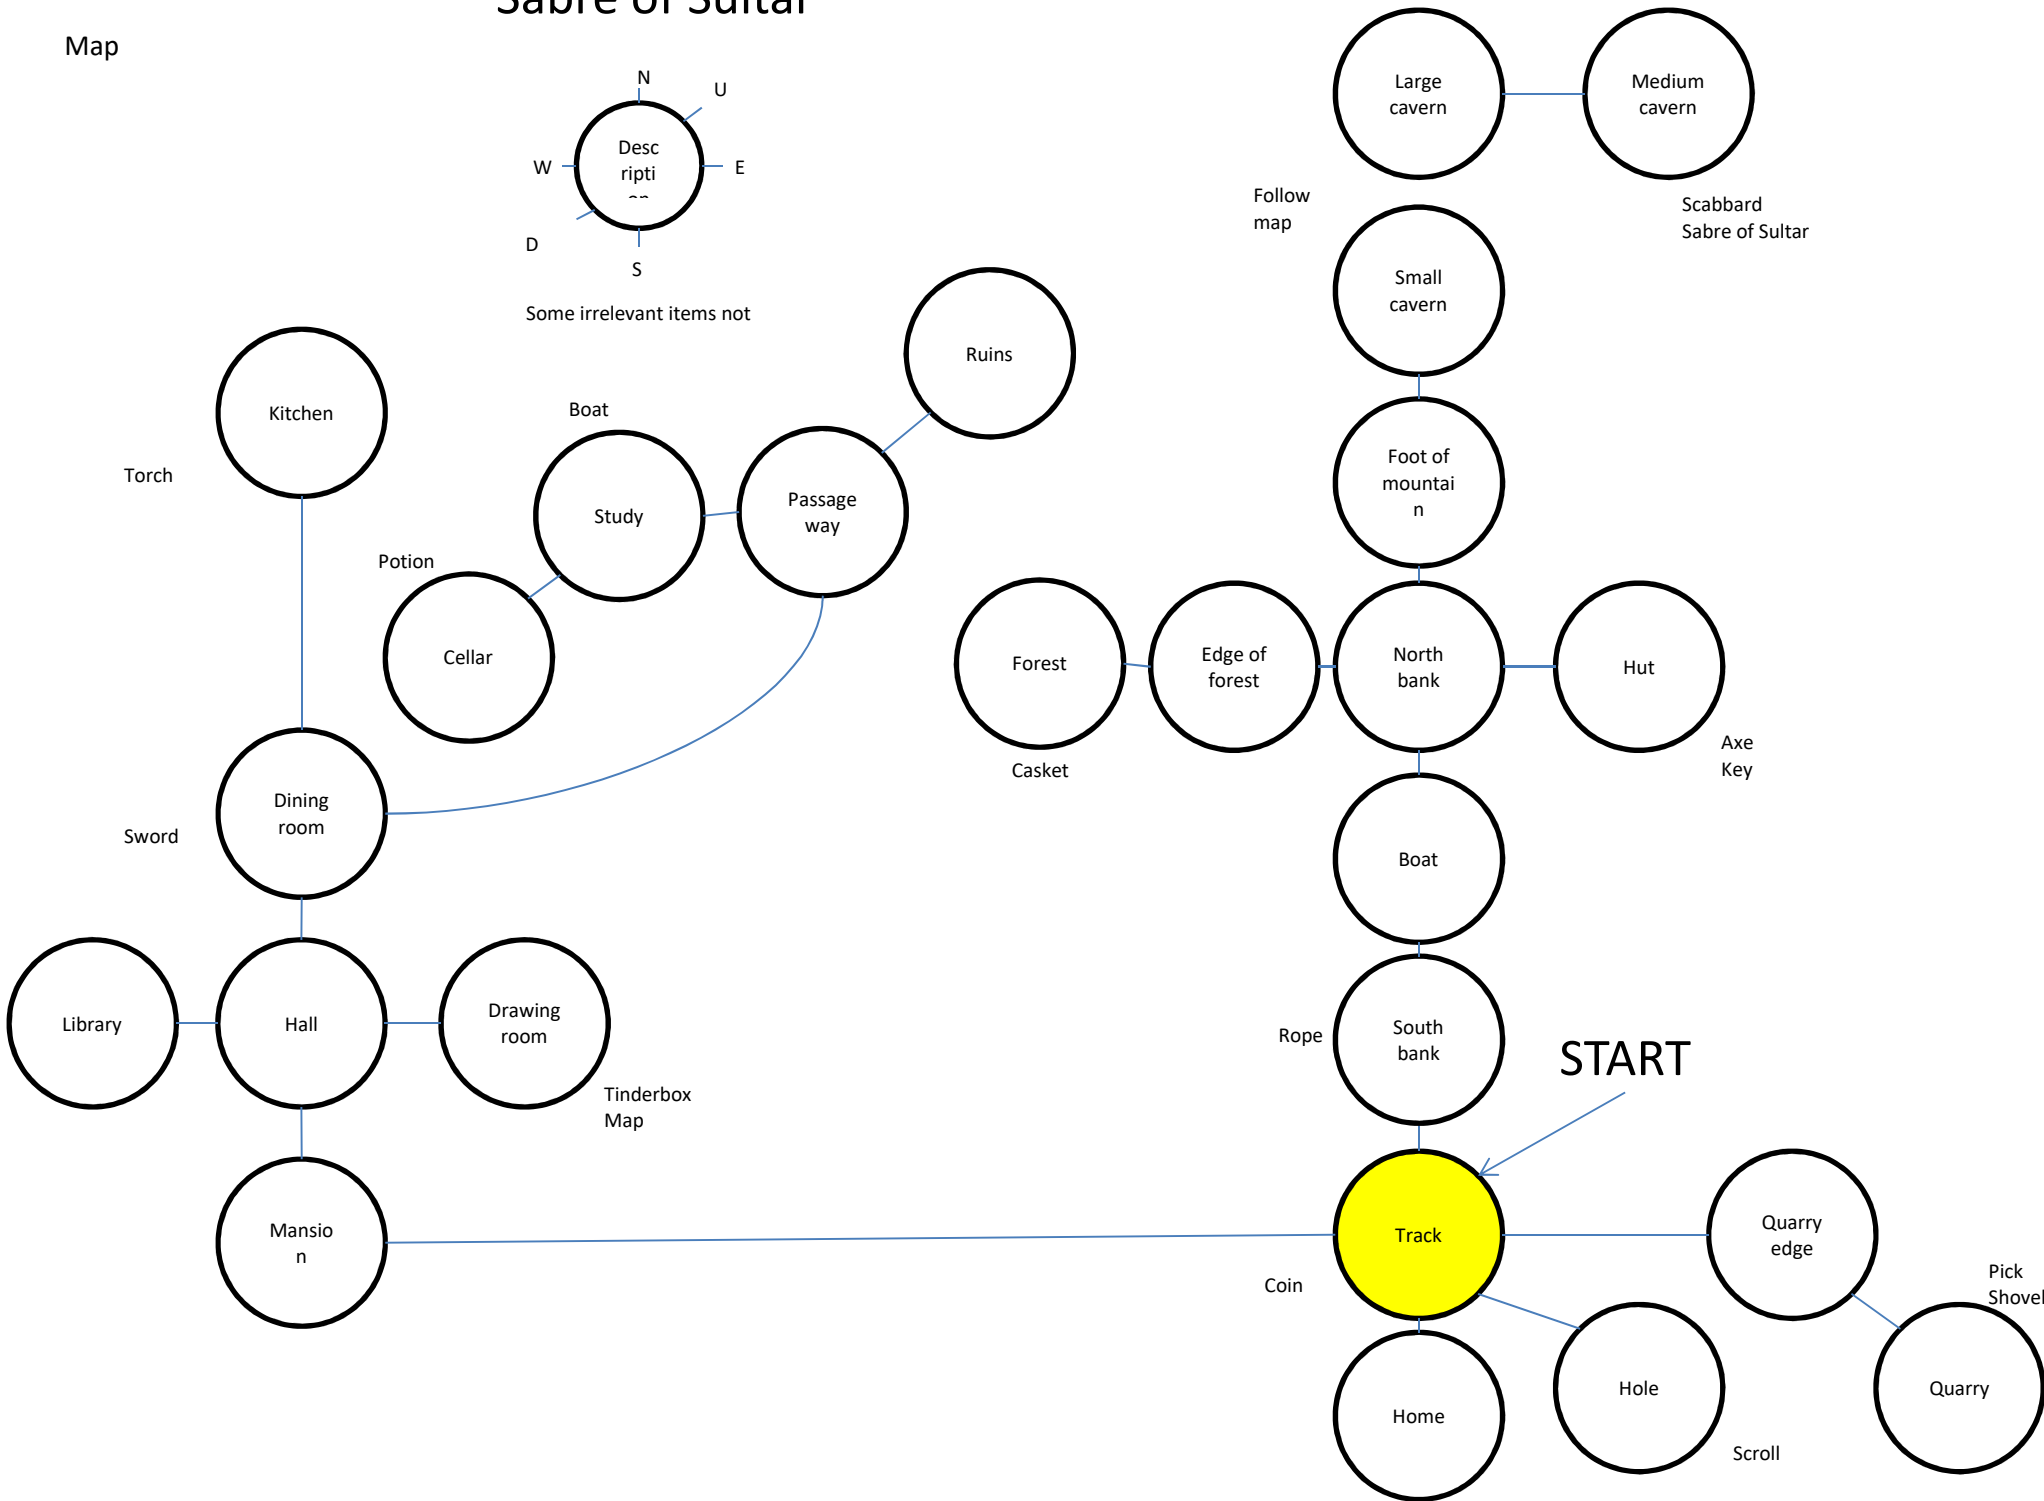

- Use the coin in the helmet to buy the rope from the elves
- Tie the rope to the tree to safely go down into the quarry to get the shovel and pick
- Find the torch and tinderbox – use them in dark places
- Find the sword to kill enemies
- Examine chimneys to find a tube with a map in it
- Lift a rug to find a trapdoor and lever it open with the pick to then find a potion
- Find a boat in a bottle and put it in the river
- Got to the hut to find an axe, also dig there to find a key
- Dig in the forest to find a casket, unlock it to find a gem
- Note the number of statues in the forest
- Cut down an oak tree with the axe to find a hole with a scroll with a magic word
- Go into the cavern and follow the map
- Put the gem in the slot with the same number as statues
- Take the scabbard and say the magic word
- Take the sabre and return home (south of the start point) to win
